

LIFT PAK 1000

Commercial Waste Compactor

The LiftPak1000 is a unique, patented commercial indoor trash compactor. Its compaction chamber design eliminates liquid messes while its removable, built-in storage cart assists with storage and the transfer of compacted trash.

The LiftPak1000:

- Saves up to 75% on labor expenses
- Saves on waste hauling expenses
- Saves up to 30% on trash liners
- Creates a cleaner, more sanitary environment
- ROI in as little as 24 months

With over 14,000 pounds of compaction force available, the LiftPak1000 compactor will hold up to 25 filled thirty gallon trash bags before it requires unloading. Its unique tram design eliminates operator attendance during the packing cycle. Electronic monitoring of all safety features ensures safe operation.

The LiftPak1000 commercial compactor reduces employee time dedicated to waste removal and eliminates waste handling. No more heavy lifting with the motorized lift cart. The compacted waste cubes reduce waste hauling and create a cleaner, safer waste compound environment.

It Compacts!

It Transports!

It Lifts & Dumps!

Commercial Waste Compactor

Who We Are

Red Devil Equipment Company is proud to be manufacturing and distributing the LiftPak1000. We look forward to serving the waste industry. Please contact us at any time at 800-543-8722 or info@liftpak.com.

We're proud of the work we do... and who we do it for. Each and every employee of Red Devil Equipment Company understands the job at hand. That's because every single one of us is focused on the same thing: providing our customers with the best equipment. Our reputation for offering a great line of equipment is stronger than ever.

COMMITMENT

Our commitment to be the industry leader in innovation is what continually drives us to design new products that set us apart from our competitors.

INNOVATION

By identifying the needs and demands of professionals, Red Devil Equipment has continually provided customers with the best solutions time and time again.

DEDICATION

In addition to offering the highest quality equipment, we are known for providing unsurpassed service and support to our entire customer base.

LIFTPAK1000

Commercial Waste Compactor

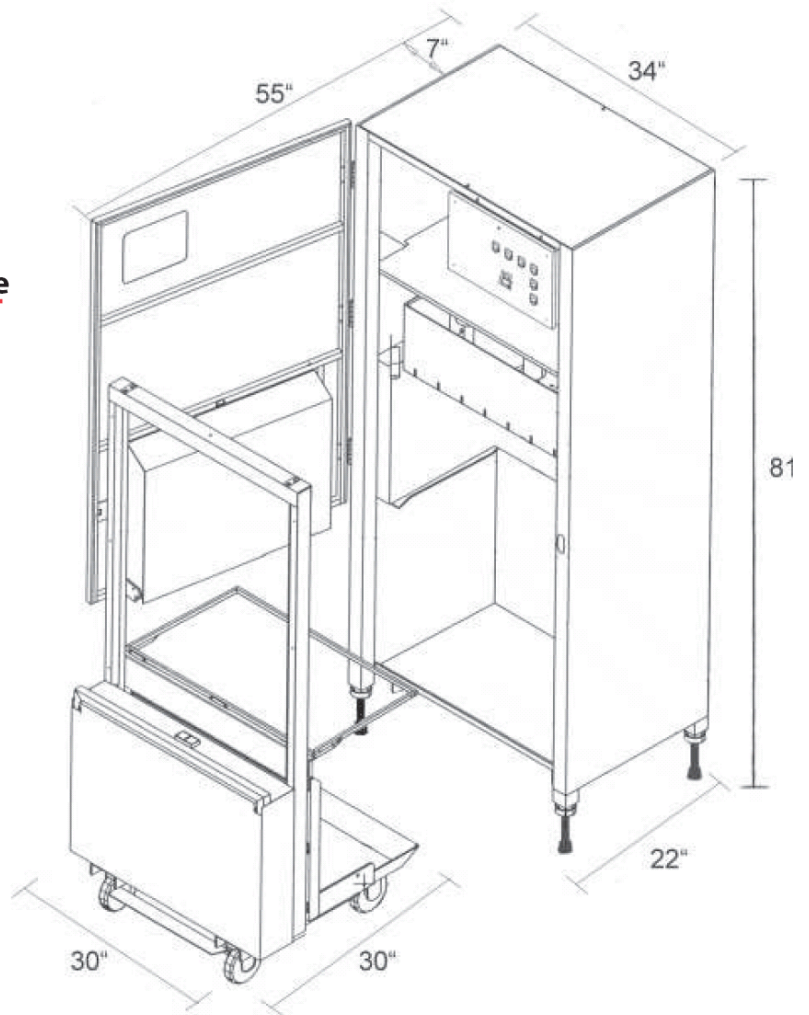

Specifications

Unit Size	81" High x 34 ½" Wide x 31 ¼" Deep
Cart Size	68" High (Handle and Hoist) x 30" Wide x 29 ½" Deep. Lift Tray Raises to a Height of 53"
Chute Door	20 ½" High x 26 ½" High
Weight	1,350 Pounds
Electric Service	120 Volt, Dedicated 20 Amp, 15 Amp NEMA 5-15 Receptacle
Capacity	Approximately 25 Thirty Gallon Filled Trash Bags into One LiftPak Cube (9 Cubic Feet)
Compaction Plate	Steel Plate with Exclusive RAM-PAK Design Spans the Horizontal Area of the Compaction Chamber Forming an Effective Seal to Prevent "Bleed Back" Eliminating the Need for Operator Attendance During Compaction.
Hydraulic Pump	Two-Stage Gear Pump
Electric Motor	Single-Phase, 1 HP Motor, 12 Amp, 120v Service
Cycle Time	25 Seconds for Full Compaction
Compaction Force	14,500 Pounds Maximum
Other Features	<p>Unique patented chamber design keeps messy liquids contained. No outside moving parts.</p> <p>Unit will not operate without cart locked into position.</p> <p>Stainless steel construction for durability and ease of cleaning.</p> <p>State-of-the-art electrical control panel monitors all safety features.</p> <p>Built-in cart has four locking wheels ensuring stability during operation of the electric lift.</p> <p>Eliminates manual lifting of compacted trash.</p>
